## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Thomas Rozsa on 11 August 2009.
3. The application has been amended as follows:
4. Claim 1 now reads: "A method of producing a framed-metal-matrix-composite-plate/sheet from a powder mixture, said method comprising: a. producing said powder mixture by uniformly mixing a matrix metal powder and at least one reinforcement material, wherein said reinforcement material is selected from the group consisting of silicon carbide, silicon nitride, titanium nitride, titanium carbide, titanium silicide, molybdenum silicide, nickel aluminate, boron carbide, aluminum nitride, aluminum oxide, magnesium oxide, gadolinium oxide, ceramic materials and mixtures thereof; b. loading said uniformly mixed powder mixture into a metal frame being a box framed on all sides to form a framed mixture, further comprising compacting said framed mixture to form a framed compact of a composite having 50% to 95% of the theoretical density and uniform composition; c. consolidating said framed compact to form a flamed-billet of a composite having a uniform composition that is between about 98% and about 100% of theoretical density, wherein said consolidation further comprises degassing of said

framed compact to form a degassed-framed-compact; d. rolling said framed-billet to form said framed-metal-matrix-composite-plate/sheet without edge cracks, wherein said plate/sheet is comprised of thin skins of said frame metal, which encapsulate said metal-matrix-composite having uniform composition as a thick core; and; e. said method results in a high sheet yield rate for producing said framed-metal- matrix-composite-plate/sheet: comprising said thick core of the composite that has said uniform composition."

***Allowable Subject Matter***

5. Claims 1-3 and 5-22 are allowed.
6. The following is an examiner's statement of reasons for allowance: prior art does not teach, suggest or disclose a method of producing a framed-metal-matrix-composite-plate/sheet comprising loading uniformly mixed powder mixture into a metal frame being a box framed on all sides to form a framed mixture in the claimed combination. The closest prior art is Nayar (US 4126451 A). Nayar discloses a method of producing a framed-metal-matrix-composite plate/sheet with the instantly claimed steps except loading the uniformly mixed powder into a metal frame being a box framed on all sides. See Figures 1-3 for example. It is noted that there is a four-sided frame (1) to enclose the powder mixture as well as punches (3,4) for the top and bottom. However, the punches (3,4) are not framed to the frame (1). Furthermore, Nayar clearly shows in Figure 3 how the punches (3,4) move relative to the frame (1) during the process. So, while Roszler (US 4027377 A) shows a method of using an encapsulated box (framed on all sides, in the Figure) to form a composite sheet, it would not have been obvious to

one of ordinary skill in the art to combine Roszler's encapsulated box method with Nayar's method because Nayar clearly shows the displacement (Figure 3) of the punches (3,4) with respect to the frame (1) during the method; therefore, use of Roszler's encapsulated box would render Nayar's method inoperable (not being able to have the situation in Figure 3, left and right side of the sheet). Furthermore, it is noted that Roszler does not meet the claimed limitations as stated in Applicant's remarks submitted 22 December 2006, pp. 11-19 and that there were well known problems with Boral (Roszler's product) as supported by evidence in affidavit submitted 22 December 2006.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
